"What you need is to join the Circle of Friends." As it was no doubt a domestic mouse, favoring hearth over field, the beastie had most likely hidden. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code..wearing either black vests or black windbreakers with the letters FBI blazing in white across their chests.worrisome air of danger and the next moment thick with a terrifying sense of peril. The Sinsemilla.'~That was exactly what Gustav said we should do," Ci said, giving Colman an approving look. "He was looking at it yesterday."They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Sterm had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..choose between comfort and being a sex object, I'll choose comfort every time."The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into .residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it..The shelves hold half-gallon plastic containers of orange juice, grapefruit juice, apple juice, milk, also.magnificent dimensions are matched by the size of her good heart..At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation..the idea of getting up from the driver's seat. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. "And now I myself am off to have a nice sit-down. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth.. The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." Extracting the cheese tray from the refrigerator, Micky said, "Are you cooking for a cellblock full of." "But all the troubles in the world," said Wendy, "have the same one answer." EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded.. "RAPE" Ha-ha, hah-hah. awareness of her master's predicament.. "He has a certain style. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?" "I thought you might need a hand with these so I did them last night. If my hunch is right, things have probably gotten a bit difficult for you. There's no sense in upsetting people who don't mean any harm. Take it from me, he's not such a bad guy.. are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible." .to come and take a look." "I sure will."
